	popcorn	VARCHAR(50)
	beverage	VARCHAR(50)
	price	INTEGER
FK	customer_id	INTEGER

Movie

PK	movie_id	SERIAL
	movie_title	VARCHAR(50)
	movie_description	VARCHAR(200)
	movie_rating	VARCHAR(10)
	movie_length_in_minutes	INTEGER
FK	ticket_id	INTEGER

One customer can buy one or many tickets (ie buying
for a family) BUT that one customer can only see one
movie.
One customer can buy many consessions

Decided to go with the 10, 2 parameters on the
NUMERIC. Inflation these days, can't be too
careful
